

CHADI EL HARI

Final year engineering student
Embedded and mobile systems
engineering
@ENSIAS-Rabat College of Engineering

HIGHLIGHT :

Your inquisitiveness drove you here, but my curiosity drives every passion I possess for understanding how things work. In
some way that's my essence, and that's what motivates me
everyday to seek even more.

INTERESTS :

- Audio-visual
- Music: Music theory and composition
- Infographics

PERSONAL INFO :

- Phone : (212) 6 26 20 88 30
- E-mail : chadi_elhari@um5.ac.ma
- elhari.chadi@gmail.com
- Meknes , Morocco

<https://elhari-chadi.github.io/>
<https://github.com/elhari-chadi>
<https://www.linkedin.com/in/chadi-elhari/>

SKILLS:

Development :

- C/C++, Java
- OpenSim, OpenCV, Scikit-Image, DLIB
- Python:Numpy,MySQL
- Visual Basic
- FPGA:VHDL, Raspberry Pi, Embedded C
- PHP,HTML,CSS,Javascript,Bootstrap, Angular,DJANGO
- Vizualisation:Latex, Matplotlib
- Compilation
- VCS:Git/GitHub

Langages:

- Arabe (Native)
- Français (Bilingual)
- Anglais (Advanced)

WORK EXPERIENCE

ENGINEER INTERNSHIP (SECOND YEAR) - SETTING UP OF A TECHNICAL BASE FOR AN AUGMENTED REALITY APPLICATION

ATOS, August 16th 2021 - September 30th 2021

As part of my second year's internship project, I worked collectively with a development team for ATOS to :

- Analyze the needs and the environment necessary to create a technical base for an AR application.
- Design and produce a technical base for an augmented reality application, which can be integrated into an e-commerce site. (Python, OpenCV, DLib)
- Design and produce an interface allowing the base to be integrated into a WEB application for previewing glass frames. (*Django, HTML, JS, CSS, SQLITE*)

ENGINEER INTERNSHIP (FIRST YEAR) - HUMAN RESSOURCES MANAGEMENT WEB APP

AMEXS, October 3th 2020 - November 26th 2020

As part of my first year's internship project, I worked as a Web Developer for AMEXS to :

- Design and produce a WEB application capable of providing management and storage of the various contact details and informations concerning the personnel of the company.
(*Bootstrap/PHP/MySQL*)

ACADEMIC PROJECTS

END OF SECOND YEAR PROJECT - VEHICLE SAFETY AND DRIVING ASSISTANCE WITH RASPBERRY PI

ENSIAS, March 30th 2021 - June 28th 2021

As part of the end of second year project, I worked collectively with a development team to:

- Study the use of machine learning in the context of the autonomous car.
- Study image processing libraries (OpenCV, Scikit-Image, Scipy and Numpy)
- Design, develop and implement a vehicle security and driving assistance system using Raspberry Pi.

RASPBERRY PI, OPENCV, TENSORFLOW, SCIKIT-IMAGE, NUMPY

END OF FIRST YEAR PROJECT - MODELING AND SIMULATING A THERAPEUTIC ROBOT FOR THE REHABILITATION OF STROKE SURVIVORS

ENSIAS, March 2nd 2020 - June 2nd 2020

As part of the end of the first year project, I worked collectively with a development team to:

- Study the rehabilitation mechanism of stroke survivors.
- Study the realization of an exoskeleton robot for rehabilitation.
- Design, develop and build a simulation of the H1 robot for the rehabilitation of stroke survivors.

OPENSIM, SIMBODY

HPC PROJECT - DETECTING FAKE VACCINES IN AIRPORTS USING BLOCKCHAIN TECHNOLOGY

This project aims to use Blockchain technology to verify the vaccination pass using its QR code. In fact, the QR code can refer to all details and personal informations concerning the potentially vaccinated person in question.

Ongoing

IOT PROJECT - COVID-19 : POTENTIAL CONTAGIOUS CASES DETECTION AND ACCESS CONTROL

The constant threat of a new Covid-19 variant poses multiple difficulties in loosening constraints concerning the use of public places. Early/Realtime detection of potential contagious cases could improve the usability of these spaces.

Ongoing

EDUCATION

DELFT DIPLOMA

Institut Français de Meknès , 2015-2017
Meknes-Morocco

INTERNATIONAL BACCALAUREATE DIPLOMA OPT FR SM B

Moulay Ismail High School , 2016-2017
Meknes-Morocco

CLASSES PRÉPARATOIRES AUX GRANDES ÉCOLES MP (MATHS SUP + SPE)

CPGE Carnot Prépra , 2017-2019
Meknes-Morocco

COMPUTER ENGINEERING DEGREE: EMBEDDED AND MOBILE SYSTEMS ENGINEERING

ENSIAS , 2019-Present
Rabat-Morocco
